Subject: FW: 4Q 2015 Domestic Well Sampling Event
4Q 2015 Domestic Well List for EPA 10-23-15.xlsx

Dave,

Below please find details on the 4Q Domestic sampling event at the Yerington site. We understand that EPA does not plan to collect split samples during this event, please confirm this is correct.

Thanks,

-jack

Subject: 4Q 2015 Domestic Well Sampling Event

Jack,

Attached for EPA's use is the Domestic Well table for the 4Q 2015 event, during which "quarterly" wells (up to 55) will be sampled. I understand from Tetra Tech that the EPA does not intend to collect split-samples during the event, which is scheduled to start at 11 AM on Tuesday, November 3rd and last through the end of Wednesday, November 4th. Please let me know if this is still correct.

Some contact information has been revised (as indicated in the table) since our last e-mail to EPA on 7/30/15. Therefore, going into the 4Q 2015 sampling event, the current totals are as follows (as of October 23, 2015):

209 wells total

180 "Yes", we have signed access agreements (although DW-69, DW-200, TW-6, and WDW019 no longer are sampled)

3 "Pending", owner(s) have indicated that a signed access agreement will be sent

3 "Outstanding", access agreement sent but not returned, we have been unable to contact by phone and/or in person

23 "No", owner(s) not interested in program, have declined access to sample their well

I'll let you know of any revisions to this information before the 4Q 2015 event, which again will start on Tuesday, November 3rd. Please let me know if you have any questions.
